

# FINSOLNET CPI + 6% PORTFOLIO

JUNE 2018

## INVESTMENT OBJECTIVE

Inception date of Finsolnet Solution: 22 September 2003  
Inception date of Sygnia CPI +6%: 20 December 2012

The objective of this strategy is to target an annual return of CPI plus 6% over a rolling 60-month period and not to lose capital over a rolling 36-month period.

## INVESTMENT VEHICLE

Registered name of the Fund: Sygnia CPI + 6% Portfolio  
Fund Category: South Africa - Multi Asset - High Equity

## MANAGEMENT FEES

Total Investment Charge: 0.87% (TER: 0.63% and TC: 0.24%)

\*TER is for Class B fund only. The TER of the Class A fund includes an additional advice fee of 0.65% plus VAT, payable to the financial advisor.

PLEASE NOTE: The performance figures above are based on the actual performances achieved by the appointed asset managers over the past five years. Past performance should not be used as an indication of future performance. This investment report is specifically composed for the Finsolnet Solution and the Sygnia CPI Minimum Disclosure Document is available on request.

## COMMENTARY

Market sentiment in June was largely driven by the erratic behaviour of US President, Donald Trump, starting with his aggressive stance at the G7 meeting, followed by the tit-for-tat trade battles with China. The US Fed added to the toxic investment environment by raising interest rates to 2%, while the ECB indicated that it would wind down its €30 billion-a-month bond-buying program by December as inflation rose to meet the ECB's 2% target. This translated into a massive sell-off in emerging markets. A number of countries, such as India, Turkey, Indonesia and Argentina, increased interest rates to protect their currencies.

The historic summit between the US and North Korea yielded little. In Europe, Italy's new coalition government confirmed that although it had no intention of leaving the eurozone, it wanted a revision of budgetary constraints. While in Turkey, Recep Tayyip Erdogan was re-elected as president, promising to exert more control over the country's monetary policy.

South Africa and other emerging markets reeled from a sharp sell-off, with their currencies near multi-year lows. The rand came within a hair's breadth of the R14/US\$ level, while yields on benchmark 10-year government bonds spiked above 9%.

Foreign investors sold R34.7 billion worth of South African bonds between January and June, the highest sell-off on record. In another shock the economy shrank by 2.2% in the first quarter of 2018 compared with the final quarter of last year, while inflation fell to 4.4%.

Unfortunately, volatility remains on the horizon as Trump continues in his quest to get China to reduce its US\$375 billion trade deficit with the US by US\$200 billion.

The last days of June brought a bit of a respite as Trump seemed to soften his stance on additional investment restrictions on China in the face of growing political and business backlash. At the same time a softer US GDP growth number calmed concerns about a hawkish US Fed. Finally, the EU Summit migration agreement reduced the political risk of Germany's coalition government collapsing.

The FTSE/JSE SWIX Index delivered a return of 2.7%, with Resources at 6.4%, Industrials at 4.9% and Financials down 2.8%. The JSE All Bond Index fell by 1.2%, while the rand depreciated by 8.1% relative to the US dollar.

The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. Sygnia Collective Investments RF (Pty) Ltd is incorporated and registered under the laws of South Africa and is registered under the Collective Investment Schemes Control Act, 2002 (Act No 45 of 2002). Sygnia Asset Management (Proprietary) Limited, an authorised financial services provider, is the appointed investment manager of the Fund. Sygnia Collective Investments RF (Pty) Ltd does not provide any guarantee with respect to the capital or return of the portfolio. Nothing in this minimum disclosure document will be considered to state or imply that the collective investment scheme or portfolio is suitable for a particular type of investor. All figures used are merely for illustrative purposes only.

This document is for information purposes only and does not constitute or form any part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase any particular investment. Whilst reasonable care was taken in ensuring that the information contained in this document is accurate, Sygnia accepts no liability in respect of any damages and/or loss (whether direct or consequential) or expense of any nature which may be suffered as a result of reliance, directly or indirectly, on the information in this document.

Additional information such as fund prices, brochures, application forms and a schedule of fees and charges can be requested via [admin@sfs.sygnia.co.za](mailto:admin@sfs.sygnia.co.za) or 0860 794 642 (0860 SYGNIA).

#### UNIT PRICES

Unit prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Forward pricing is used and Fund valuations take place at approximately 15:00 each business day. The exception takes place at month-end when valuations are performed at 17:00. Purchases and redemption requests must be received by the manager by 14:00 each business day to receive that day's price. The price shown is specific to this class. The fund size represents the portfolio size as a whole. Unit prices are updated by 10:00 every business day and are available on our website [www.sygnia.co.za](http://www.sygnia.co.za).

#### FEES

The annual management fee comprises applicable basic fees paid to underlying managers, Sygnia's annual service fee and advice fees payable to financial advisors (where applicable). Any balance remaining after payment of these amounts is rebated back to the Fund.

A schedule of fees, charges and maximum commissions is available on request from the Company. Commission and incentives may be paid and if so, would be included in the overall costs. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees.

Initial and ongoing advice fees may be facilitated on agreement between the Client and Financial Advisor. The payment of these fees is facilitated by the LISP and not directly by Sygnia.

Performance based fees are calculated in terms of the supplemental deed for certain of our asset managers where they outperform the Fund's stated benchmark. This performance fee will be paid by the Fund to the underlying investment manager and only when the Fund's performance exceeds that of the benchmark.

#### TER

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past year. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, Securities Transfer Tax [STT], STRATE and FSB Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns. The TER charged by any underlying fund held as part of a fund's portfolio is included in the TER figure, but trading and implementation costs incurred in managing the fund are excluded. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money.

#### PERFORMANCE

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily an indicator of future performance.

#### INVESTMENT POLICY

The Sygnia CPI + 6% Fund is a multi-asset class fund managed with a high exposure to equities in order to seek long-term returns of at least 6% per annum above inflation while still seeking to moderate the short-term volatility of returns. The Fund will have exposure to both domestic and foreign assets, which will include equities, fixed interest and money market assets and will comprise of a number of underlying portfolios managed by a range of different managers selected by Sygnia. The Fund has a benchmark of CPI + 6% per annum and will maintain a total equity exposure of below 75% of the portfolio.
